

Frontend Developer Intern (f/m)

Blockpit is a fast-scaling start-up dealing with blockchain technology. We offer global monitoring solutions for cryptocurrency traders and corporates that include tax reporting and automated real-time calculation of legal figures.

We are looking for a highly motivated frontend developer intern to further strengthen our team. You will be working on our main application and other complex and challenging projects. We are building up everything from scratch, so there is no legacy codebase to fight against.

Your tasks

- ✓ Self-responsible development of the main application
- ✓ Conception and implementation of new functions
- ✓ Development and rollout of internal software solutions
- ✓ Optional: development of our mobile application

Your qualifications

- ✓ Skills in web development (JavaScript, Typescript, HTML, CSS)
- ✓ Skills in Angular and REST APIs
- ✓ Interest in UI and UX optimization
- ✓ Structured method of operation, ability to work independently
- ✓ Bonus: experience with the Ionic framework

Your benefits

- ✓ Take part in the early days of a rising business
- ✓ 3 or more months lasting internship
- ✓ Insights into the start-up world
- ✓ A competitive salary from € 1,000 per month (38.5 hrs/week)
- ✓ Regular team events
- ✓ Possibility of a fulltime employment after your internship

Our office is at factory300 in Linz, but location-independent working is possible.

We are looking forward to your application in our mailbox: hr@blockpit.io
(Or just call/WhatsApp our CTO: +43 650 41 88 213)
